woocommerce-rental-and-booking/rnb/booking-content

The mentioned area had many unused fields, so we have overridden this file in the child theme to display only the relevant information.

The message "Select Start Date, preferably 1-2 days before you plan to wear it" was also added to this file.

astra-child/woocommerce
We have customised a few WooCommerce files to align with the design of the product listing, product details, cart, checkout, and email templates.

astra-child/mvx-pro/marketplace-membership/myaccount
This page had many unused fields, so we have overridden this file in the child theme to display only the relevant information.

astra-child/mvx-pro/marketplace-membership/rental-pro
Vendor dashboard > Rentals > Add Inventory
Vendor dashboard > Rentals > All Inventory

These pages had many unused fields, so we have overridden this file in the child theme to display only the relevant information.

mvx-pro: The functionalities and utilities managed through MVX Pro have been overridden from this directory.

astra-child/MultiVendorX

/emails
Emails sent when renting a product have been customised in terms of content and branding. The related files are stored here.

/vendor-dashboard

Due to this template having many widgets we do not need, this was customised to show only relevant information.

From this directory, we have customised:

- The dashboard navigation
- The product manager section
- Widgets on the dashboard
- Coupon manager

We have also added a separate file, including a page named "Vendor Documentation."

Additionally, a few snippets have been added to functions.php to support the customizations made in the above directory, including CSS and JS.
